Morrisby Higher provides all the tools to help sixth form and college students make the best choices for their next steps, whether that is employment, university or an apprenticeship. With the built in Morrisby Tracker, they are also able to record their activities against SkillsBuilder employability skills to evidence their readiness to progress further.

Student self-discovery

A range of easy-to-use assessments and career tools help your students to understand who they are, their strengths and aspirations. Results are matched to the most appropriate careers, subjects and courses and students receive a detailed insight report.

Destinations research

A comprehensive database of careers, courses and subjects is ready to be searched, compared and favoured. Unique to Morrisby, the assessments feed into the matches to help students get ideas, regardless of their starting points. With over 600+ careers, 5000+ apprenticeships and 30,000+ courses at varying levels, there is something for everyone.

Applications support

The new personal statement wizard and tutor markup takes the strain out of producing and revising a statement suitable for UCAS. Students have tools to record open days and applications, keeping all research and progress towards their destination in one place.

Activity & skills tracking

The bundled Tracker provides all the tools to record and evidence your careers and enrichment activity, complete with Gatsby benchmarks and SkillsBuilder steps. Students can build their learner passports; a digital record of achievement and a fantastic aid to assist the development of a personal statement. This also provides evidence of the skills they have attained.

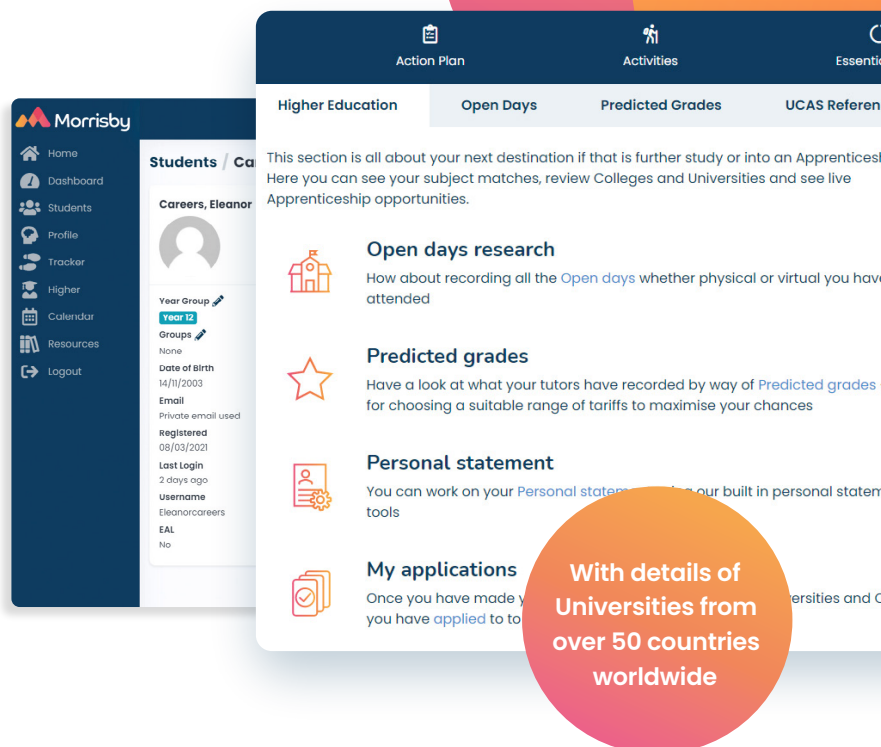

Management system

Support applications & UCAS

Detailed tools support the major processes such as the recording of predicted grades and the assembly of academic references. These come complete with alerts and “chase up” to ensure timeliness. These are added to the already very impressive Morrisby Manager dashboards that flow seamlessly from Y7 upwards. Higher includes the ability to synchronise with MIS systems such as SIMS and iSAMS to greatly reduce administration.

Information at a glance

The student page groups all of the key information and progress together so you can see how an individual is progressing. This allows tutors and pastoral staff to get the full picture and makes it easy to prepare for individual conversations and guidance, with built-in face-to-face meeting tools and student action planning.
